

More than 50 new features in MAGIX Video Pro 6

- Native 64-bit version with:
 - Bridge technology for 32-bit Quicktime
 - Bridge technology for 32-bit recording module
- Movie Objects (Nested Sequences)
- Upload auf showfy.com
- New native Intel codec for H.264 with flexible configuration options for Ultra HD and 4K
- Online upload presets for Ultra HD
- Film settings for Ultra HD
- Support for RAW image formats
- Advanced import compatibility for 4K/Ultra HD
- Optimized JPEG reading routine for maximum compatibility and improved performance
- Improve import compatibility
- Transition preview in HD (Content)
- Optimized handles for image size/adjusting positions with integrated rotation handle
- Import MET projects
- Selected touch elements
- Option for automatic waveform creation when importing
- Reduced amount of memory needed when often using color correction
- Adjustments made to dialogs to fit program design (CD-import)
- Swap channels for multistream 3D files

Integrated professional measuring instruments for:

- Vectorscope
- Waveform Monitor
- RGB Parade
- Histogram

Fine tuning effect handling

- Performance optimization color correction GUI
- Edit fields in effect pages with spin controls and mouse drag function
- Keyboard qualifier to limit X/Y axes when moving objects
- Differing keyframe interpolation within objects
- Image size/position can be applied relative to pre-positioned object groups
- Center vertically and horizontally using separate buttons
- Visual comparison of saturation effects processed by GPU/CPU

Effect plugins

- proDAD Mercalli V2 (64-bit version)
- Red Giant Magic Bullet Quick Looks 1.4 (64-bit version)
- Support for plugins with own GUI (z.B. proDAD Defishr)

Support for high DPI

- GUI automatically adjusts to different display pixel densities
- Possible to manually switch size of GUI elements in the program settings window

Transition dialogs

- Embedded GUI
- Adjustments to various parameters
- Improved presets in the alpha transitions

New content

- 2 Intros/Outros
- 15 DVD menus
- 1 Decorative element

Performance optimizations (particularly to multitrack performance)

- Faster audio decoding
- Quality scaling during realtime playback
- Intelligent disc preloading
- Multithread optimization
- Optimizations to color conversion
- Optimizations to preview scaling
 - Porting of various effects for GPU (blur, sharpen, HDR)
 - Porting of transitions on GPU (leaves, waves, shutter)
 - Optimizations to display in storyboard mode when working on large projects

New and improved video effects

- HDR effect
- Adjustments to GUI blur/sharpen
- Soft keyframing blur
- Smoother look for artistic blur

New and improved audio effects

- Wind/Rumble filter
- Mastering Suite 4

New codec prices

- DVCPRO and AVC-Intra for only 59,99 € (CHF 79,00, £59.99, \$69.99)
